Sweet dreams are made of these...

Lorena Chesney of XX Interiors and EX Showhouse Furniture

As the days draw in and the nights become longer, it's easy to feel the chill in the air. But there's no need to let the weather dictate your style. Instead, embrace the cozy atmosphere of your home with warm colors and soft textures. EX Showhouse Furniture has put together a selection of beds, headboards, and lamps that are perfect for creating a welcoming and inviting space.

Now more than ever, extra emphasis is being placed on our bedrooms. Not only do they need to be restful, but they also need to be an extension of our personality. No longer should the bedroom be the dumping ground for unturned laundry, forgotten papers, and an array of shoes and handbags. The bedroom should be a sanctuary, a place to relax and unwind.

When planning a bedroom design it's important to consider the space you have available. A bed is a key feature and it's important to choose one that suits your needs. If the room is small, a compact bed or a Murphy bed may be the best option. If the room is larger, you may have more flexibility in terms of style and size.

For those fortunate enough to have a large bedroom, it's tempting to create a cantilevering bed frame or a floating bed. However, this can be a risky proposition as it may cause accidents and can be dangerous for small children. Instead, consider a traditional bed frame with sturdy legs and a sturdy headboard.

The headboard is not only a functional piece but also an aesthetic one. It can add height to the room, create a focal point, and add style to the bedroom. Consider choosing a headboard that complements the style of the room and adds to the overall look.
